Personal Care Packaging Automation with Cartoning and Case Packing from Douglas Machine

ALEXANDRIA, MN. (November 28, 2018) – Douglas' Vantra™ IM automatically cartons electronic toothbrush kits into retail cartons. The integrated Axiom® IM case packer upends cartons and packs up to four cartons into shipping cases. Douglas' single source capabilities for cartoning and case packing of food, beverage and personal care products provides producers with procurement, operation and support advantages. Consistent changeovers, reliability and package quality are ensured through the HMI changeover adjustment checklist, eight power adjustments, laser date coder and non-conforming case and open flap detection reject stations.

About Douglas Machine Inc.

Founded in 1964, Douglas Machine Inc. (Douglas) is a global leader in automated secondary packaging solutions for paperboard, corrugated and shrink film. The company specializes in the design and manufacture of case & tray packers, shrink wrap systems, cartoners, sleeves, multipackers and palletizers. Based in Alexandria, Minnesota, Douglas is an employee-owned company that has installed more than 9,000 machines in 30 countries.
